

# New Plastic MDO-X Clip

## Product Brief

**CURRENT POLYAIRES CLIP**

**NEW STYLE CLIP**

**Product:** New plastic MDO-X Clip to be used as an alternative to standard wire 'Ear' Clip

**Usage:** All MDO-X models except MDO-X 230mm (which has snap clips)

**Reason for Adding to range:** Some customers do not like the current Polyaire wire clip (for various reasons) and won't use our product based on this. The alternative plastic clip should overcome this objection.

## New Plastic MDO-X Clip

Product Brief  
December 2009

### I. Product Description

Plastic MDO-X Clip designed to push through existing perforations in MDO-X products to firmly attach to ceiling. Made from high performance engineering polymer

The new clip will be available in packs of 4 from December 09.

Item Code is 231064 for pack of 4

### 2. Product Testing

The clip strength was tested by attaching an MDO-X to a simulated ceiling with 4 x new clips and then putting them under extreme downward pressure by hanging weights from the MDO-X itself. This test has now been running for some three weeks and the clips show no signs of structural fatigue

MDO-X attached to ceiling with new clips (Black Cable ties are holding suspended weights)
