

DOUBLE DEFLECTION REGISTER - FIXED CORE

Features

- Universal Outlets or Double Deflection Registers are generally used in sidewall applications.
- Consist of two separate rows of individually adjustable vanes - Front and Rear Vanes.
- Front Vanes - horizontal so the primary air leaving the outlet is directed above the room occupants and does not reach the occupied zone until well mixed with the secondary room air.
- Rear Vanes - vertical and are used to direct the air in a straight blow or spread the air as required by the room layout. If required, air flow can be directed at an angle to one or both sides, and still retain a near-parallel air stream pattern.
- Construction is all extruded aluminium horizontal and vertical blades, retained in a fixed or removable Core.
- Standard finish is powder coat white while other finishes are available to suit the interior and architectural design requirements.

Double Deflection Register - Fixed Core

Item #	Nominal Neck Size		Face Size	
	mm	inch	mm	inch
