

DAMPERS - QUICK FIX 24V

Features

- Employs a unique design to minimise the chance of duct leaks due to faulty attachment.
- The duct is attached to each spigot using special cable ties. Each spigot has a slightly positive taper with a pronounced ridge at the edge. This means that the cable tie will become tighter the closer it gets to the edge, minimising the chances of duct detachment.

Polyaire Quick Fix Motor Damper - Insulated 24V (Green)

Item #	Sizes Available/Dimensions	
	mm	inch
532070	150	6"
