

Roundjet - Plastic

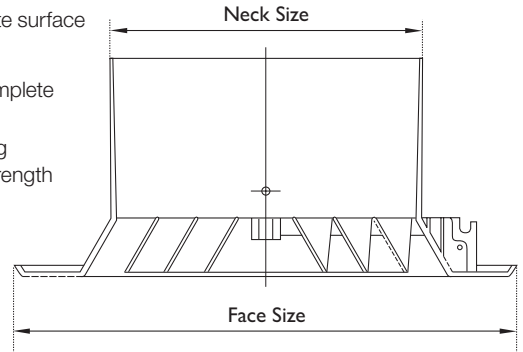

The Polyaire Roundjet is designed to jet the airflow right down to the floor which aids in mixing and circulating the air.

It is particularly efficient for rooms with higher ceilings and stairwells where a stronger more direct flow is required to get to the floor level and mix properly.

Features

- Flush mounting
- Easy clean non reflective white surface
- 2 sizes, 150mm & 200mm
- Fully adjustable flow from complete shut off to fully open
- Constructed from engineering grade plastic for long term strength and stability

Roundjet - Plastic
